The hardening process of polyamides and polyesters at
the moment of fiber formation was investigated by the
method of direct measurement of the thread diameter
and of birefringence. The hardening of polyamides and
polyesters in a thin stream upon formation of the fiber
from the melt is expressed by a complex curve with a
non-linear dependence of the change in the magnitude
of the fiber diameter on the height of the chimney. The

Order from OTS or SLA \$1.10 61-27300

Trans. of Energomashinostroenie (USSR) 1960 [v. 6]
no. 8, p. 22-26.

DESCRIPTORS: *Steam turbine blades, Vibration,
Mathematical analysis, Turbine blades.

A new method is proposed for calculating the natural
frequencies of vibration of 1st and 2nd modes for
arrays of steam turbine blading. Compared with the
existing method of calculation with the same number of
integration portions, calculation with the same number
(Machinery--Engines, TT, v. 6, no. 10) (over)
